WORK EXPERIENCE

QAP srl - Belgium, Saive

Full Stack Developer

[24/03/2025 - Current]

- Designed and deployed customized web solutions leveraging cutting-edge technologies (React, Node.js, Vue.js), optimizing performance and user experience for a diverse clientele operating across various industry sectors.
- Led comprehensive client needs analyses through a structured consultation process, effectively transforming business requirements into detailed technical specifications and strategic development roadmaps, ensuring perfect alignment between business objectives and technical solutions.
- Developed scalable architectures and maintained constant technological watch to integrate industry best practices, ensuring the sustainability and competitiveness of deployed solutions.
- Coordinated multidisciplinary development teams and established tailored agile methodologies, optimizing delivery cycles while maintaining high quality standards.

JDev - Belgium, Grace-Hologne

Full Stack Developer

[01/09/2024 - 23/03/2025]

- Leveraged modern web technologies like React, Node.js, and Vue.js to deliver customized solutions for a diverse range of clients across various industries.
- Conducted thorough client consultations to understand business needs, translating them into technical specifications and development plans.

Masana.care - Belgium, Tournai

Web and Mobile Developer

[01/09/2023 - 31/08/2024]

- Developed and implemented innovative web and mobile applications specifically designed for the e-health sector, improving patient engagement and streamlining healthcare provider workflows.
- Collaborated closely with healthcare professionals, designers, and other stakeholders to create user-friendly interfaces and ensure that applications met clinical requirements.
- Integrated secure data handling protocols, including encryption and user authentication, to comply with healthcare regulations such as GDPR, CE certification and ISO-9001.
- Integrated Internet of Things (IoT) devices with back-end systems, facilitating automated data collection and real-time monitoring.

Timbtrack, Rhisnes - Belgium, Rhisne

Back-End and mobile Developer

[01/03/2020 - 31/08/2023]

- Developed new features for a forest management application, expanding its capabilities to better serve large-scale forestry operations.
- Optimized the existing codebase, improving scalability and reducing server response times which significantly enhanced user satisfaction.
- Implemented advanced data processing algorithms to efficiently handle large datasets, enabling more accurate tracking and management of forestry resources.
- Collaborated with front-end teams, ensuring seamless integration of back-end services with user interfaces for a cohesive application experience.

Oscar S.A. - Belgium, Andenne

Full Stack Developer

[01/05/2019 - 29/02/2020]

- Created a groundbreaking application that enabled real-time communication between ground airport equipment and stock management systems, revolutionizing logistical operations.
- Integrated Internet of Things (IoT) devices with back-end systems, facilitating automated data collection and real-time monitoring.
- Ensured reliable data transmission by implementing robust communication protocols and advanced error-handling mechanisms.

Voo - Belgium, Herstal

Tech and Mobile Advisor

[01/07/2012 - 30/04/2019]

- Provided expert diagnostics and technical support for a wide range of company systems, assisting customers weekly with their technical issues.
- Trained and mentored new team members, sharing best practices in technical support and customer service, which improved team performance overall.

EDUCATION & TRAINING

CESS

Institut de Formation Continué Waroux [01/09/2013 - 30/06/2015]

City: Liège | Country: Belgium

Developer certification

Becode [01/10/2018 - 30/04/2019]

City: Liège

LANGUAGE SKILLS

Mother tongue(s): French

English

LISTENING: B1 **READING:** C1 **WRITING:** C1

SPOKEN PRODUCTION: B1

SPOKEN INTERACTION: B1

SKILLS

typescript | HTML / HTML5 : très bonne connaissance | SASS/LESS | Solidity | Git/Gitlab/Github |
Développement web PHP Laravel | Node Js | Webservices SOAP/REST | Linux | GraphQL | Outils - Docker,

Gitlab | Database: SQL, MySQL, MongoDB | Langage et Framework JavaScript: React JS, Next JS | VueJs | React
React-Native | CI/CD | Jest testing framework | React, Next.js, React Native | Multiple PHP (Laravel) Projects |
devcontainer | PHP 8
